THE BENEFITS OF

QUALITY WOOL CARPETS

We love the cosy softness of wool carpets, but the benefits of this 100% natural fibre go far beyond comfort.

FIRE RETARDANT

Wool fibre has a higher ignition threshold than many other fibres and is flame retardant up to 600ºC.

AIR QUALITY

Wool fibres rapidly absorb common pollutants from the home or office, and retain them until they can be vacuumed out.

CLIMATE CONTROL

Wool reacts to changes in temperature, absorbing and desorbing large quantities of moisture from the air to control humidity.

REDUCES ODOURS

Recent tests, carried out by AgResearch^ confirm that wool carpet absorbs up to 4 times as many odours as other carpet types.

HARD WEARING

Wool has an essential structural crimp that allows pile fibres to repeatedly rebound and refresh.

ACOUSTIC INSULATION

Wool carpet can act as a sound absorber and also dampens any impact noise in a room.†
